“I was like a boy playing on the sea-shore, and diverting myself now and then finding a smoother pebble or a prettier shell than ordinary, whilst the great ocean of truth lay all undiscovered before me.”

Isaac Newton

Dear Colleagues,

On behalf of the Organizing Committee and the Scientific Advisory Board of more than 50 world renowned experts it is our great pleasure to welcome you at the 4th International Congress on Theoretical and Applied Mechanics that is held in Vrnjačka Banja, Serbia, June 3-7, 2013. The Congress is organized by Serbian Society of Mechanics, under the auspice of Ministry of Education, Science and Technological Development of Republic of Serbia.

Congress will focus in all aspects of Mechanics.

The papers, contributed by authors from all around the globe, have been separated into 7 sections which cover the main areas of interest, e.g. 'Plenary lectures', 'Section A', Section B', Section C', Section D' and Two Minisimposia.

The Congress organizing committee wishes to acknowledge the collaboration of the Ministry of Education, Science and Technological Development and Municipality of Vrnjačka Banja.

We are sure that besides the superb technical program, you will enjoy the idyllic spa town of **Vrnjačka Banja**, a well-developed tourist destination, and the traditional Serbian hospitality.

Welcome to Vrnjačka Banja

Serbian Society of Mechanics

The Serbian Society of Mechanics is a voluntary, non-governmental, vocational and professional, non-political union of scientists and experts engaged in work in theoretical and applied mechanics; it is established on the principle of freedom of association and open to collaboration with other scientists and experts, economic and other organizations, on the basis of mutual appreciation, respect and independence in work, organized in order to achieve common and general aims and objectives.

Aims and Objectives of the SSM

- to bring together researchers and practicing engineers involved in theoretical and applied mechanics, with the aim of encouraging development and making advances in all areas of theoretical and applied mechanics
- to help all members of the SSM with the scientific and professional development
- to take care of the youth working in this field
- to enable the members of the SSM to conduct research into some areas of mechanics, establishing collaboration with other types of organizations
- to publish, support and help to publish scientific books, journals and other publications
- to support and organize scientific gathering, publishing of scientific papers and other publications which are of interest to the members of the society

Co-Presidents: **Stevan Maksimović & Tomislav Igić**

Sponsors and Supporting Members

The Congress 2013 Organizing Committee would like to thank the following Organizations for their support to 4th International Congress organized by Serbian Society of Mechanics

Ministry of Education, Science and Technological Development of Republic of Serbia.

NUMERICAL MODELING OF CONVECTIVE AND DIFFUSIVE MASS TRANSPORT IN BIOLOGICAL MEDIA

Miloš Kojic

Abstract. Mass transport represents the fundamental processes within living organisms. It is of enormous importance to have computational methods to model transport within biological media. In principle, two types of mass transport can be distinguished: convective and diffusive. Further, these two types can occur simultaneously. Biological conditions are far more complex than those usually met in nature or engineering so that computational modeling is still a big challenge. The complexity comes not only due to different time and length scales, spanning from picoseconds to days and from nano – to macro-scales, but also due to bio-chemical interactions between the transported matter (biofluid, cells, molecules, particles and drugs) and the surroundings as vessel walls or tissue microstructure. Classical methodology of modeling based on standard formulations for solids and fluids and their interactions must be extended to include biological phenomena. For example, blood flow in small vessels must include motion of cells, or, in diffusive transport - interaction between transported molecules and solid phase within the porous medium must be taken into account.

In the R&D Center for Bioengineering in Kragujevac and the Methodist Hospital Research Institute in Houston, our primary focus has been in last few years on development of methods and software for modeling of transport of cells and particles within small vessels and on diffusion of molecules and particles within complex biological media. Also, we have participated in an FP7 EU grant (University of Kragujevac) for developing models for atherosclerosis. Here, we summarize the main results, which include our original concepts in computational methodology and a number of solutions that are of interest for medical applications. The original computational software relies on our solvers PAK developed over 40 year period, and modern interfaces for connecting computational models with imaging records, as well as graphical pre-and post-processors.

PETIGA: SOLUTION OF HIGHER-ORDER PARTIAL DIFFERENTIAL EQUATIONS

Victor Calo

Abstract. In this paper, a high-performance isogeometric analysis framework for solving partial differential equations is presented. It is called PetIGA, and in this work is used to solve the phase field-crystal equation. This is a sixth-order, nonlinear, time-dependent, partial differential equation. The framework is heavily based on PETSc, a scientific library geared towards the implementation of scalable solvers needed to approximate solutions to partial differential equations. PetIGA is an open source library, that can be used to assemble matrices and vectors which come from a Galerkin weak form, discretized using B-spline basis functions. The phase field-crystal formulation that is dealt with cannot be solved using standard finite element technologies, as it requires the use of higher-order continuous basis functions.

LINEAR AND NONLINEAR DYNAMICS OF HYBRID SYSTEM

Katica R. (Stevanović) Hedrih

ABSTRACT. Discrete continuum method (see references [32,33, 40]) for investigation of linear and nonlinear dynamics of hybrid systems containing coupled multi deformable bodies is presented. By use coupled rods, beams, strings, plates and membranes by discrete continuum mass less layers as well as layers with translator and rotator inertia properties into hybrid system series of hybrid system dynamics are investigated and phenomenological mappings in dynamics of these different real system is identified. Expressions of generalized forces of subsystem interactions in hybrid system are presented by component mechanical energies and functions of energy dissipations. A model of dynamical dislocations with inertia properties in plate is presented. Transfer energy between subsystems. Constitutive relation of standard elements of discrete continuum coupling layers with translator and inertia properties, nonlinear elastic and fractional order properties are presented. Interaction between two coupled linear and nonlinear system, each with one degree of freedom as well as dynamics of discrete no homogeneous chain are considered in the light of mathematical analogy for obtaining eigen time functions of solutions of component deformable body displacements in hybrid system dynamics.

Also, lecture present series of the discrete system with hybrid dynamics in the form of coupled rotations and with ideal or no ideal constraints as well with vibro-impacts. Theorem of existence of trigger of coupled singularities in the phase portraits of the system with coupled rotations is presented.

Series of the original results of lecturer and doctorates supervised by lecturer will be listed.

**ADAPTIVE MATERIALS AND STRUCTURES:
AN OVERVIEW**

Ardeshir Guran

ABSTRACT. In the last few decades, there has been an increasing need to design and construct material systems that can adapt their behavior, composition, outlook, and realize shape to the needs imposed on them by changing environmental and design requirements. This paper gives a short overview of the field of adaptive materials and structures. The objective is to make the researchers in the field and related disciplines familiar with some ideas and developments in this area and to provide a basis for more extensive surveys. Furthermore results of some new investigations of the post-critical behavior, stability, and control of imperfection sensitive elastic structures will be presented.

ORTHOGONAL FUNCTIONS AND HYBRID APPROXIMATIONS FOR VARIATIONAL PROBLEMS

Mohsen Razzaghi

ABSTRACT

The available sets of orthogonal functions can be divided into three classes. The first class includes sets of piecewise constant basis functions (e.g., block-pulse, Haar, Walsh, etc.). The second class consists of sets of orthogonal polynomials (e.g., Chebyshev, Laguerre, Legendre, etc.). The third class is the set of sine-cosine functions in the Fourier series. While orthogonal polynomials and sine-cosine functions together form a class of continuous basis functions, piecewise constant basis functions have inherent discontinuities or jumps. Signals frequently have mixed features of continuity and jumps. In such situations, neither the continuous basis functions, nor piecewise basis functions taken alone would form an efficient basis in the representation of such signals. In recent years, the hybrid functions consisting of the combination of block-pulse functions with Chebyshev polynomials, Legendre polynomials, Bernoulli polynomials, or Taylor series have been shown to be a mathematical power tool for discretization of selected problems. In this talk, we present the hybrid functions of block-pulse with Legendre polynomials and block-pulse with Bernoulli polynomials and their applications for variational problems. Numerical examples are included to demonstrate the applicability and the accuracy of the proposed method and comparisons are made with the existing results.

**CONSTRAINT REACTIONS IN OPTIMAL CONTROL OF
MECHANICAL SYSTEMS**

Josif Vuković, Aleksandar Obradović

ABSTRACT

This paper is dedicated to the establishment of a general procedure of forming the optimal control problem of variable-mass nonholonomic rheonomic mechanical systems, where reactions of constraints are present in differential equations of motion. Dimensions and structure of a configuration space depend on the number of reactions of constraints that are the subject of our interest, i.e. only the reactions whose magnitudes are subjected to limitations are considered. In this paper, the procedure enables the direct application of Pontryagin's maximum principle for the systems with limited phase state. Attention is particularly focused on discussing various modes of realizing the control by combining the active control forces and subsequent imposition of ideal holonomic mechanical constraints. Brachistochronic motions play an important role in this type of problems, because in them the control of motion can be realized exclusively with ideal constraints. The paper provides three examples of this method application, which are related to the realization of the brachistochronic motion of mechanical systems.

ON THE POINCARE'S PERIODIC ORBITS OF THE FIRST KIND IN THE MODIFIED PLANE RESTRICTED CIRCULAR THREE BODY PROBLEM

П.С. Красильников, А.Г. Сараева

ABSTRACT

Abstract. The problem of the existence of Poincare's periodic orbits of the first kind in the modified plane restricted circular three body problem is considered. It is supposed that the masses m_1, m_2 of two main bodies satisfy the condition $\mu=m_1/m_2 \ll 1$, the third body of zero mass moves subject to the jet force of the ionic engine and the attraction of main bodies. We assume that the jet acceleration is constant and directed on the fixed point of axis which connects the main bodies. On the basis of a method of small parameter the conditions of the existence of two set of periodic orbits are obtained. The first set has the constant period which is equal to the period of non perturbed circular orbit. The second set of orbits has the period depending on small parameter μ .

9:50-10:35 ISODYNE STRESS ANALYSIS OF STRESS STATE IN CONTACT REGIONS

Dragan B. Jovanović

ABSTRACT

Abstract. The rapid progress in analytical and numerical stress analysis, together with engineering requirements regarding reliability and economic aspects of the applied procedures, and the progress in measurement science, have altered the objectives of experimental stress analysis (ESA). At the present time, three major issues of the contemporary ESA can be identified: to test the reliability and accuracy of prediction of the analytical solutions and numerical procedures; to produce reliable data on the actual stress fields in real bodies made of real materials, which can be used for development of new analytical and numerical procedures; and to determine in the form of benchmarks--the practical boundaries between the regions in plates where stress state deviates insignificantly from the plane stress state, and the regions where the stress state is three-dimensional [10].

These issues are main objectives of the three-dimensional experimental stress analysis. The third issue is of major importance, considering that it has been well known for more than fifty years that stresses in plates in regions of notches (and cracks) are strongly three-dimensional. Those facts are still neglected in determination of such design parameters as the stress concentration factors and stress intensity factors, which are of major importance to design engineers. The procedure developed to date and presented in the paper is a hybrid electronic-manual procedure. It involves electronic recording of the isodyne fields, manual determination of the isodyne orders in chosen sections, electronic determination of the indicated and load-induced isodyne functions, and of the isodyne surfaces. It is shown that the developed techniques are more reliable and accurate, and more cost-efficient than the traditional techniques of the photomechanics.

		<i>Chairs: Slobodan Stupar, Dragoslav Kuzmanović, Branislava Novaković,</i>
Room II	10:55 - 11:15	STRESS-STRAIN ANALYSIS AT HYDRO ACCUMULATOR CYLINDER C20: B. Rakić, L. Ivanović, D. Josifović, A. Ilić
	11:15 - 11:35	ON THE POST-CRITICAL BEHAVIOUR OF AN OPTIMALY SHAPED ELASTIC COLUMN WITH CLAMPED-SIMPLY SUPPORTED ENDS POSITIONED ON ELASTIC FOUNDATION C10: B. N. Novaković
	11:35 - 11:55	THE STIFFNESS MATRIX OF THE FIXED-END COMPOSITE FRAME ELEMENT C3: B. Deretić Stojanović, S. Stošić, S. Kostić
	11:55 - 12:15	ELASTICITY TENSOR IN ANISOTROPIC DAMAGE MECHANICS C4: J. Jarić, D. Šumarac, D. Kuzmanović
	12:15 - 12:35	RECONSTRUCTION OF STRAIN ENERGY SURFACES AT THE CRACK TIP VICINITY C5: D. B. Jovanović
	12:35 - 12:55	STRESS ANALYSIS OF THIN-WALLED STRUCTURAL ELEMENTS OF TURBINE BLADE SHAPE C49: N. Andelić, V. Milošević-Mitić, T. Maneski, A. Petrović

NOTES:

		Afternoon Session
		<i>Chairs: Dražan Kozak, Miroslav Živković, Ivana Atanasovska</i>
Room II	14:10 - 14:30	DETERMINATION OF CRACK GROWTH TRAJECTORY: EXPERIMENTAL AND NUMERICAL COMPARISONS C14: S. Perković, M. Blažić, S. Boljanović, V. Stefanović
	14:30 - 14:50	THE NUMERICAL ANALYSIS OF STRAIN AND STRESS STATE OF COMPOSITE SHAFT C6: Z. Đorđević, I. Atanasovska, M. Blagojević, D. Momčilović
	14:50 - 15:10	IMPROVED COMPUTATION METHOD TO FATIGUE AND FRACTURE MECHANICS ANALYSIS OF AIRCRAFT STRUCTURES C7: S. Maksimović, I. Vasović, M. Maksimović, M. Đurić
	15:10 - 15:30	CRACK GROWTH ANALYSIS OF EDGE NOTCHED COMPONENTS UNDER CYCLIC LOADING C23: S. Boljanović, S. Maksimović, A. Carpenteri
	15:30 - 15:50	THE EFFECTS OF THERMAL GRADIENTS ON STRESS DISTRIBUTIONS C12: O. Ognjanović, K. Maksimović, D. Stamenković
	15:50 - 16:10	BUCKLING AND POSTBUCKLING BEHAVIOUR OF LAYERED COMPOSITE STRUCTURES BY FINITE ELEMENTS C2: M. Bojanić, S. Boljanović, K. Maksimović
		Late Afternoon Session
		<i>Chairs: Mira Petronijević, Slobodanka Boljanović, Dragi Stamenković</i>
Room III	16:30 - 16:50	TRANSVERSE VIBRATION OF PLATES WITH EDGE BEAMS USING SPECTRAL ELEMENT METHOD C9: M. Nefovska-Danilović, M. Petronijević, M. Radišić
	16:50 - 17:10	BENDING AND FREE VIBRATION FINITE ELEMENT ANALYSIS OF THIN COMPOSITE PLATES BASED ON ISOGEOMETRIC PARADIGM C11: O. Peković, S. Stupar, A. Simonović, Z. Posteljnik
	17:10 - 17:30	LIMIT ANALYSIS, OPTIMUM CONDITIONS AND OPTIMUM STRUCTURAL DESIGN OF METAL SHELLS C25: T. Igić, D. Turnić
	17:30 - 17:50	CRACK DEFLECTION INTO AN INTERFACE BETWEEN THE TWO ORTHOTROPIC MATERIALS C43: J. M. Đoković, R. R. Nikolić
	17:50 - 18:10	FATIGUE CRACK GROWTH IN 2024-T3 ALUMINIUM ALLOY C8: N. Petrašinović, D. Petrašinović, S. Trivković, A. Simonović, S. Stupar

Wednesday, June 5th

Morning Session

Room III

		<i>Chairs: Strain Posavljak, Milosav Ognjanović, Valentin Glavardanov</i>
10:55 - 11:15	NUMERICAL DETERMINATION OF CREEP FRACTURE MECHANICS PARAMETER C* FOR SINGLE EDGE CRACK IN A PLATE UNDER TENSION C42: M. Katinić, D. Kozak, N. Gubeljak, M. Rakin, B. Međo, A. Sedmak	
11:15 - 11:35	ANALYSIS OF SIGNIFICANT PARAMETERS ON DYNAMIC BEHAVIOUR OF THE DEEP MINE HOIST INSTALLATIONS C16: M. Hadžalić, S. Posavljak, N. Vukojević	
11:35 - 11:55	ON THE PROBLEM OF NICOLAI WITH VARIABLE CROSS-SECTION AND PRE-TWISTING EFFECT C17: A.P. Seyranian, V.B. Glavardanov	
11:55 - 12:15	FATIGUE LIFE ANALYSIS FOR THREE-DIMENSIONAL CRACKED LUGS UNDER LOAD SPECTRUM C18: M. Blažić, I. Ilić, Y. Assoul	
12:15 - 12:35	COMPARISON OF FEM AND SPH METHODS USED FOR ANALYSIS OF SOLID BODIES C19: M. Topalović, M. Ivanović, M. Živković, A. Dišić	
12:35 - 12:55	GEAR TRANSMISSION UNIT VIBRATION RELATED TO DESIGN PARAMETRERS AND RESONANCES C30: S. Vasin , M. Ristić, M. Ognjanović	

NOTES:

Thursday, June 6th

Morning Session

Chairs: Predrag Kozić, Ratko Pavlović, Aleksandar Sedmak

Room II

10:55 - 11:15	TRANSVERSE VIBRATION OF A DAMPED BEAM WITH ONE STEP CHANGE SUBJECTED TO AXIAL FORCE C44: G. Janevski, N. Nešić, P. Kozić, I. Pavlović
11:15 - 11:35	EXPERIMENTAL DETERMINATION OF BASIC PARAMETERS FOR ACTIVE VIBRATION CONTROL SYSTEM DEVELOPMENT C22: M. Jovanović, A. Simonović, S. Stupar, N. Zorić, N. Lukić
11:35 - 11:55	EFFECT OF PASTERNAK FOUNDATION ON FLEXURAL VIBRATION AND BUCKLING OF SYMMETRIC CROSS-PLY LAMINATES C46: D. Karličić, R. Pavlović
11:55 - 12:15	STOCHASTIC STABILITY OF A VISCOELASTIC DOUBLE-BEAM SYSTEM UNDER WIDEBAND NOISES C47: I. Pavlović, R. Pavlović, P. Kozić, G. Janevski, I. Ćirić
12:15 - 12:35	MODIFICATION OF WING STRUCTURE- EXTENSION OF WING WALK COMPOUND C48: S. V. Đurković, V. Gobeljić, M. Ostojić, T. Nikolić Milkovski, T. Mihovilović, M. Grbić
12:35 - 12:55	ANALYSIS OF COMPOSITE BEAMS MATERIALS AND ADHESIVES C1: P. Smiljanić A. Sedmak, E. Džindo

Afternoon Session

Chairs: Rastislav Mandić, Ljudmila Kudrjavceva, Nikola Maričić

Room II

14:10 - 14:30	EFFECTS OF THE LOADING RATE ON CONTACT STRESSES OF A ROLLER BEARING: A COMPUTATIONAL STUDY C45: M. Vasko, A. Guran, L. Jakubovicova, P. Kopas
14:30 - 14:50	THERMOMECHANICS OF SOFT INELASTIC BODIES - AN APPLICATION TO ASPHALT BEHAVIOR C13: M. Mićunović, Lj. Kudrjavceva, M. Topalović, I. B. Ivanović
14:50 - 15:10	LINEAR ANALYSIS OF SINGLE DELAMINATION IN LAMINATED COMPOSITE PLATE USING LAYERWISE PLATE THEORY C26: M. Marjanović, Đ. Vuksanović
15:10 - 15:30	CFD SIMULATIONS IN SMALL BULB TURBINE WITH ADJUSTABLE RUNNER BLADES C27: Đ. Novković, N. Maričić, Z. Glavčić

15:30 - 15:50	EXPERIENCES IN THE NUMERICAL MODELLING OF MASONRY INFILLED FRAMES C28: R. Mandić, R. Salatić, Z. Perović
15:50 - 16:10	THERMOGRAPHY AND NUMERICAL SIMULATIONS WITH RESPECTS TO STRESS STATE AND FRACTURE OF CONTINUOUS CAST SPECIMENS MADE OF BRONZE ALLOY C35: B. Skorić, M. Arsenović, M. Kutin, I. Vasović, M. Ristić, Z. Milutinović

Late Afternoon Session

Chairs: Milan Mićunović, Taško Maneski, Biljana Deretić

Room II

16:30 - 16:50	THE STRESS ANALYSIS OF THE SPUR GEARS TOOTH ROOT AND ITS COMPUTATION MODEL C34: D. Ristić, D. Milosavljević
16:50 – 17:10	REVIEW OF MODERN NUMERICAL METHODS FOR STRESS INTENSITY FACTOR DETERMINATION C31: A. Grbović, G. Kastratović, N. Vidanović, B. Rašuo
17:10-17:30	STRENGTH ANALYSIS OF COMPOSITE STRUCTURAL ELEMENTS FOR UNMANNED AERIAL VEHICLE C24: I. Ilić, Lj. Ilić, S. Perković, M. Blažić
17:30 - 17:50	CRACK GROWTH ANALYSIS OF STRUCTURAL ELEMENTS WITH SEMI-ELLIPTIC SURFACE CRACK C33: D. Stamenković, K. Maksimović, Lj. Milović
17:50 - 18:10	INVESTIGATION OF THE BEHAVIOUR OF FRAME STRUCTURE STABILITY IN ELASTO-PLASTIC DOMAIN C21: S. Čorić, S. Brčić

NOTES:

Friday, June 7th

		Morning Session
		<i>Chairs: Radovan Slavković, Gordana Jovičić, Gordana Bogdanović</i>
Room II	10:55 - 11:15	PARTITIONED THERMO-MECHANICAL COUPLING PROCEDURE OF FEM COMPONENTS C40: V. Dunić, N. Busarac, V. Slavković, N. Grujović, M. Živković, R. Slavković
	11:15 - 11:35	ANALYSIS OF INFLUENCE CHOICE FATIGUE FAILURE CRITERIA TO ASSESS THE INTEGRITY OF WAGON STRUCTURE PARTS C39: V. Milovanović, G. Jovičić, M. Živković, D. Rakić, A. Dišić
	11:35 - 11:55	NUMERICAL DETERMINATION OF PARAMETERS OF JOHNSON-COOK MATERIAL MODEL C36: A. Dišić, M. Živković, V. Milovanović
	11:55 - 12:15	THE NUMERICAL ASSESSMENT OF THE STRUCTURAL INTEGRITY OF THE TIBIA-IMPLANT USING FAILURE CRITERIA C37: J. Živković, G. Jovičić, S. Vulović, Z. Stepanović, M. Živković
	12:15 - 12:35	STRESS INTEGRATION OF MATSUOKA-NAKAI CONSTITUTIVE MODEL USING INCREMENTAL PLASTICITY METHOD C38: D. Rakić, M. Živković, V. Milovanović, N. Milivojević, D. Divac
	12:35 - 12:55	FAILURE ANALYSIS OF A COMPOSITE LAMINATE MODELED USING THE HIGHER ORDER DEFORMATION THEORY C41: A. Radaković, D. Milosavljević, G. Bogdanović, L.J. Veljović

NOTES:

Section D

Tuesday, June 4th

Morning Session

Chairs: Siniša Mesarović, Dragutin Debeljković, Nenad Marković

Room III

10:55 - 11:15	ELASTO-PLASTIC BEHAVIOUR AND ULTIMATE LOAD OF PLATE GIRDERS SUBJECTED TO PATCH LOADING D32: N. Marković, D. Turnić, T. Igić
11:15 - 11:35	FURTHER RESULTS ON FINITE-TIME STABILITY OF SINGULAR TIME-DELAY SYSTEMS: DELAY-DEPENDENT CONDITIONS D2: S.B. Stojanović, D.Lj. Debeljković, G. Simeunović, N. Dimitrijević
11:35 - 11:55	MECHANICAL PROPERTIES INVESTIGATION OF COMMERCIAL AND NANOPHOTONICS SOFT CONTACT LENSES D3: V. Veljić, A. Debeljković, Đ.Koruga
11:55 - 12:15	COMPUTATION OF ACOUSTIC SOURCES FOR THE LANDING GEAR OF AIRCRAFT DURING THE TAKE-OFF AND LANDING D4: V. Jazarević, B. Rašuo
12:15 - 12:35	MICROMECHANICS OF DILATANCY, CRITICAL STATE AND SHEAR BANDS IN GRANULAR MATERIALS D5: S. Dj. Mesarović, J. M. Padbidri, B. Muhunthan
12:35 - 12:55	RANDOM SOIL PARAMETERS EFFECT TO THE ACCURACY ON ROCKET IMPACT POINTS OF MULTIPLE LAUNCHER ROCKET SYSTEMS D15: S. Jovanović, D. Živanić, M. Milošević

Afternoon Session

Chairs: Mihailo Lazarević, Nenad Gubeljak, Đuro Koruga

Room III

14:10 - 14:30	FERTILISATION AS A BIOMECHANICAL OSCILLATORY PHENOMENON IN MAMALS D1: A. Hedrih, M. Lazarević, A. Mitrović-Jovanović
14:30 - 14:50	THERMAL BEHAVIOUR AND TRANSVERSAL JOINT DISTANCE COMPUTATION FOR GRAVITY RCC DAMS D6: V. Kuzmanović, Lj. Savić, N. Mladenović
14:50 - 15:10	WAVE PROPAGATION DUE TO A MOVING LOAD D7: M. Petronijević, M. Radišić, M. Nefovska Danilović

15:10 - 15:30	FLIGHT PERFORMANCE DETERMINATON OF THE TURBOPROP AIRCRAFT D8: K. Velimirović, N. Velimirović
15:30 - 15:50	KINEMATIC AND DYNAMIC MODEL OF THE HUMAN CENTRIFUGE D9: J. Vidaković, V. Kvrgić, G. Ferenc, Z. Dančuo, M. Lazarević
15:50 - 16:10	THE INFLUENCE OF TERRAIN SLOPE ON IMPACT POINT OF ROCKETS AT BURST LAUNCHING FROM MLRS D10: M. Milošević, V. Đurković, Z. Gajić

Late Afternoon Session

Chairs: Dejan Momčilović, Ljubica Milović, Dragica Jevtić

Room III

16:30 - 16:50	ASSESSMENT OF THE FATIGUE LIFE REDUCTION OF MACHINE PARTS WITH CORROSION PIT D11: D. Momčilović, I. Atanasovska, Lj. Milović, Z. Đorđević
16:50 – 17:10	FRAGMENT SHAPE DISTRIBUTION IN EXPLOSIVELY DRIVEN FRAGMENTATION D12: P. Elek, S. Jaramaz, D. Micković
17:10-17:30	INFLUENCE OF IMPROVED STATOR CURVE ON THE CHARACTERISTIC OF VANE PUMP D13: R. Petrović, R. Slavković, N. Todić
17:30 - 17:50	MECHANICAL PROPERTIES OF FIBER REINFORCED CONCRETE MADE WITH POLYPROPYLENE FIBERS D28: D. Jevtić, A. Savić
17:50 - 18:10	INFLUENCE FORM FUNCTION NETWORK CONSTRUCRION PIPELINE IN THE OPTIMAL PARAMETERS IN DISTRICT HEATING AND COOLING D27: Š. M.Bajmak

Thursday, June 6th

Morning Session

Chairs: Drago Blagojević, Boško Rašuo,Sreten Mastilović

Room IV

10:55 - 11:15	ON DYNAMICS OF A SPATIAL DISORIENTATION TRAINER FOR PILOT TRAINING D20: Z. Dančuo, V. Kvrgić, B. Rašuo, J. Vidaković
11:15 - 11:35	INTEGRITY ASSESSMENT FOR TANK WITH CRACKS IN WELDED JOINTS D21: K. Jovičić, R. Jovičić, M. Prokolab, B. Jegdić

11:35 - 11:55	MOLECULAR DYNAMICS SIMULATION OF NANOSCALE TAYLOR TEST D22: S. Mastilović
11:55 - 12:15	DEFINING AND TESTING OF RIGIDITY AND NONLINEAR LOADS AND RELAXATION PULLING-REPULSIVE DEVICES D23: D. Blagojević, M. Todić, O. Miletić
12:15 - 12:35	ELASTOPLASTIC ANALYSIS OF TRUSSES SUBJECTED TO CYCLIC LOADING D24: Z. Perović, D. Šumarac
12:35 - 12:55	PRACTICAL APPROACH TO INTEGRATED DESIGN OF AERONAUTICAL COMPOSITE CONSTRUCTIONS USING CATIA CAD SOFTWARE D30: Z. Vasić, V. Stefanović, P. Dragičević

Late Afternoon Session

Chairs: Marko Rakin, Ines Grozdanović, Mladen Todić

Room IV

16:30 – 16:50	NONLINEAR DYNAMICS OF SPRING-BLOCK EARTHQUAKE MODELS D16: S. Kostić, I. Franović, K. Todorović, N. Vasović
16:50 - 17:10	WEAK AND STRONG COUPLED STOCHASTIC OSCILLATORS WITH DELAYS IN COUPLING D14: I. B. Grozdanović, N. I. Burić, K. D. Todorović, N. T. Vasović
17:10 - 17:30	INFLUENCE OF WELDED JOINT GEOMETRY ON FRACTURE BEHAVIOUR - MICROMECHANICAL ASSESSMENT D26: B. Međo, M. Rakin, N. Gubeljak, D. Kozak, A. Sedmak
17:30 - 17:50	DEVELOPMENT OF SOFTWARE PAK-M FOR CALCULATION OF MAGNETOSTATIC FIELD D29: M. Blagojević, M. Živković
17:50 - 18:10	VISUAL CONTROL OF A MOBILE ROBOT USING HOMOGRAPHY AND LEARNING FROM DEMONSTRATION METHODOLOGY D17: M. Mitić, Z. Miljković, N. Vuković, I. B. Lazarević

Minisymposium M1: Computational Bioengineering

Thursday, June 6th

Morning Session

Chairs: Nenad Filipović, Miloš Kojić, Zoran Marković

Room III

10:55 - 11:15	EVALUATION OF BORDERLINE CORONARY LESIONS USING NONINVASIVE COMPUTED FRACTIONAL FLOW RESERVE M1-6: L. Velicki, N. Čemerlić-Adić, R. Jung, N. Tomić, O. Adić, D. Nikolić, I. Saveljić, D. Milašinović, N. Filipović
11:15 - 11:35	HIERACHICAL MODEL FOR DIFFUSION WITHIN BIOLOGICAL MEDIA M1-7: M. Milosević, M. Kojić, N. Kojic, M. Ferrari, A. Ziemys
11:35 - 11:55	ELECTROMYOGRAPHY DETECTION OF BIOELECTRICAL ACTIVITY IN THE MUSCULUS QUADRICEPS FEMORIS OF ELITE VOLLEYBALL PLAYERS AFTER DIFFERENT TRAINING INFLUENCES M1-8: R. Radaković, A. Peulić, S. Kovač, N. Filipović
11:55 - 12:15	THREE-DIMENSIONAL COMPUTER MODELING OF PLAQUE FORMATION AND LDL TRANSPORT WITHIN ARTERY AND THROUGHT THE VESSEL WALL M1-9: Z. Milošević, D. Nikolić, I. Saveljić, M. Radović, T. Exarchos, O. Parodi, N. Filipović
12:15 - 12:35	INVESTIGATION OF ANTIOXIDATIVE ACTIVITY MECHANISMS OF ALISARINE MOLECULE M1-10: S. Jeremić

NOTES:

Afternoon Session

Chairs: Dalibor Nikolić, Lazar Velicki

Room III

14:10 - 14:30	WHY DOES O–H BOND DISSOCIATION ENTHALPY EFFECTIVELY REPRESENT FREE RADICAL SCAVENGING ACTIVITY OF FLAVONOIDS M1-22: D. Amić, V. Stepanić, B. Lučić, Z. Marković, J. M. Dimitrić Marković
14:30 - 14:50	NON-INVASIVELY ASSESSMENT OF KNEE CARTILAGE STRESS DISTRIBUTION USING MOTION CAPTURE SYSTEM AND FINITE ELEMENT METHOD M1-11: N. Mijailović, S. Petrović, D. Nikolić, A. Peulić, N. Zdraković, B. Ristić, N. Filipović
14:50 - 15:10	ESTIMATION OF WAVE DISPERSION AND ATTENUATION FOR THE ASSESSMENT OF HEALING BONES M1-12: V. Potsika, V. Protopappas, M. Vavva, K. Raum, D. Rohrbach, D. Polyzos, D.I Fotiadis
15:10 - 15:30	ROLE OF OSCILLATORY SHEAR INDEX IN PREDICTING THE OCCURRENCE AND DEVELOPMENT OF PLAQUE M1-13: M. Blagojević, A. Nikolić, M. Živković, M. Živković, G. Stanković
15:30 - 15:50	FINITE ELEMENT ANALYSIS OF GENERIC EXPANDABLE STENT DEPLOYMENT AND FATIGUE TO FRACTURE ANALYSIS M1-14: A. Vukićević, G. Jovičić, N. Filipović
15:50 - 16:10	FINITE ELEMENT ANALYSIS OF THE FACIAL SKELETON ON SIMULATED OCCLUSAL LOADING M1-15: I. Saveljić, A. Janović, D. Nikolić, Z. Rakočević, M. Đurić, N. Filipović

Late Afternoon Session

Chairs: Radivoje Radaković, Aleksandar Peulić

Room III

16:30 - 16:50	COMPUTER SIMULATION OF MOTION OF MAGNETIC PARTICLES IN EXTERNAL MAGNETIC FIELD M1-1: V. Isailović, B. Ćirković, Z. Milošević, A. Sofla, M. Radišić, N. Filipović
16:50 – 17:10	PREDICTION OF CORONARY PLAQUE POSITION ON ARTERYS WITH MYOCARDIAL BRIDGE M1-2: D. Nikolić, S. Aleksandrić, M. Tomasević, M. Radović, V. Ranković, N. Filipović
17:10-17:30	NUMERICAL SIMULATION OF IONTOFORESIS IN THE DRUG DELIVERY SYSTEM M1-3: M. Živanović, G. Bijelić, A. Savić, N. Filipović

- 17:30 - 17:50** APPLICATION OF DATA MINING TECHNIQUES FOR MAMMOGRAM CLASSIFICATION
M1-4: M. Radović, M. Đoković, A. Peulić, N. Filipović
- 17:50 - 18:10** UNDERSTANDING ANTIOXIDANT PROPERTIES OF NATURAL COMPOUNDS AT THE ATOMIC SCALE
M1-21: P. Trouillas

Friday, June 7th

Morning Session

Chairs: Zoran Marković, Nenad Filipović

Room III

- 10:55 - 11:15** MODELING OF AXONAL ELONGATION BY STEM CELL USING FINITE ELEMENT MODEL
M1-16: M. Obradović, N. Filipović
- 11:15 - 11:35** MODELING OF TORQUE WITH FRICTION EFFECT FOR WATER HYDRAULIC AXIAL PISTON MOTOR
M1-17: N. Todić, N. Filipović, R. Petrović
- 11:35 - 11:55** INVESTIGATION OF THE CHEMICAL BEHAVIOR OF QUERCETIN
M1-18: J. Đorović, Z. Marković
- 11:55 - 12:15** COMPUTER MODELING OF INHIBITION PROCESS IN NANOCOATING OF SURFACES WITH NANOCONTAINERS
M1-19: D. Petrović, M. Obradović, M. Radović, A. Jovanović, S. Jovanović, D. Baloš, M. Kojić and N. Filipović
- 12:15 - 12:35** DFT INVESTIGATION OF THE REACTION OF BAICALEIN WITH HYDROXY RADICAL
M1-20: D. Milenković, Z. Marković
- 12:35 - 12:55** COMPUTER SIMULATION OF MOTION OF SOLID PARTICLES IN LAMINAR FLOW USING STRONG SOLID-FLUID COUPLING COMPUTATIONAL SCHEME
M1-5: T. Đukić, S. Savić, N. Filipović

NOTES:

Minisymposium M2: Nonlinear Dynamics

Thursday, June 6th

Morning Session

Chairs: Katica Hedrih, Dragan Milosavljević

Room I

10:55 - 11:15	WAVE PROPAGATION IN ORTHOTROPIC MATERIALS M2-10: G. Bogdanović, D. Milosavljević, L.J. Veljović, A. Radaković
11:15 - 11:35	ABOUT RIGID BODY OSCILLATIONS AROUND TWO INCLINED AXES WITHOUT INTERSECTION M2-11: L.J. Veljović, D. Milosavljević, G. Bogdanović, A. Radaković
11:35 - 11:55	FINITE ELEMENT MODELING OF WINDSHIELD- AND WING-BIRD STRIKES M2-12: M. Ugrčić
11:55 - 12:15	NONLINEAR PHENOMENA OF ELECTROCHEMICAL SYSTEM PERTURBED BY CURRENT INTERRUPT TECHNIQUE M2-13: N. Potkonjak, D. Minić, Lj. Kolar-Anić, Z. Nikolić, S. Anić
12:15 - 12:35	STABILITY ANALYSIS OF STATIONARY REGIMES IN TRANSVERSE OSCILLATIONS OF COUPLED PLATE SYSTEM M2-20: J. Simonović

Afternoon Session

Chairs: Katica Hedrih, Ljiljana Kolar-Anić

Room I

14:10 - 14:30	UNSTABLE ORBITS IN THE SOLAR SYSTEM M2-21: M. Marjanov
14:30 - 14:50	STUDY OF MECHANICAL PROPERTIES OF COMMERCIAL AND NANOPHOTONICS MATERIALS FOR SOFT CONTACT LENSES BY OPTOMAGNETIC SPECTROSCOPY M2-18: V. Veljić, A. Debeljković, Đ. Koruga
14:50 - 15:10	THE FORCED VIBRATIONS OF COMPLEX CIRCULAR MEMBRANE SYSTEM WITH VISCO-ELASTIC COUPLING M2-2: J. Simonović, M. Cajić, D. Karličić
15:10 - 15:30	DYNAMIC STATES OF CORTISOL IN FUNCTION OF CHOLESTEROL CONCENTRATION M2-3: V. Marković, A. Stanojević, Ž. Čupić, V. Vukovjević, Lj. Kolar-Anić

- 15:30 - 15:50** ONE SCENARIO FOR TRANSITION FROM SUPERCRITICAL TO SUBCRITICAL ANDRONOV-HOPF BIFURCATION POINT
M2-4: B. Stanković, Ž. Čupić, N. Pejić, Lj. Kolar-Anić
- 15:50 - 16:10** INTERMITTENCIES IN BRIGGS-RAUSCHER OSCILLATING SYSTEMS
M2-5: I. N. Bubanja, S. Maćešić, E. Greco, R. Cervellati, S. D. Furrow, Ž. Čupić, S. Anić and Lj. Kolar-Anić

Late Afternoon Session

Chairs: Ivana Kovačić, Nataša Trišović

Room I

- 16:30 - 16:50** BRACHISTOCHRONIC MOTION OF A NONHOLONOMIC MECHANICAL SYSTEM WITH LIMITED REACTION OF CONSTRAINTS
M2-6: R. Radulović, A. Obradović, B. Jeremić
- 16:50 – 17:10** BURSTING OSCILLATIONS IN A SINGLE DEGREE OF FREEDOM NONLINEAR OSCILLATOR
M2-7: Z. Rakarić, I. Kovačić
- 17:10-17:30** DYNAMIC OF DIFFERENT STRUCTURES OF GALAXIES - NECESSARY CONDITIONS FOR STABLE NONLINEAR STRUCTURES
M2-24: M. Vukčević
- 17:30 - 17:50** BULK WAVES IN FIBRE REINFORCED MATERIALS
M2-9: D. Milosavljević, G. Bogdanović, LJ. Veljović, A. Radaković
- 17:50 - 18:10** THE DISPERSIVE ISOTHERMAL KINETICS OF NICOTINAMIDE RELEASE FROM POLY(ACRYLIC-CO-METHACRYLIC ACID) XEROGEL
M2-26: B. Adnađević, T. Đajić, J. Jovanović

Friday, June 7th

Morning Session

Chairs: Mirjana Filipović, Julijana Simonović

Room I

10:55 - 11:15	VIBRATION DAMPING OF A SINGLE-LINK FLEXIBLE ROBOT WITH (PIEZO)VISCOELASTIC ELEMENT OF FRACTIONAL ORDER M2-15: M. Cajić, D. Karličić, M. Lazarević
11:15 - 11:35	RELATION BETWEEN CABLE-SUSPENDED PARALLEL ROBOT AND CLASSIC ROBOTIC STRUCTURE M2-16: Lj. Kevac, A. Đurić, M. Filipović
11:35 - 11:55	DYNAMICAL SYSTEM ANALYSIS FOR THE BRAY–LIEBHAFSKY REACTION UNDER CSTR CONDITIONS M2-25: S. N. Blagojević, Ž. Čupić, S. M. Blagojević, Lj. Kolar-Anić
11:55 - 12:15	TESTING OF SINGULARITY AND POSITION OF NON-LINEAR DYNAMICS RELATIVE EQUILIBRIUM OF HEAVY MATERIAL PARTICLE ON ECCENTRICALLY ROTATING ROUGH CIRCLE LINE, WITH CONSTANT ANGULAR VELOCITY M2-23: M. Stamenković, M. Mikić
12:15 - 12:35	VIZUALIZATION OF THE THREE CRITICAL SPACES RELATED TO THE 6-DOF MACHINERY M2-8: A. Đurić, M. Filipović, W. Chen
12:35 - 12:55	WAVELET FAMILIES – A PRIMER M2-27: N. Trišović

NOTES:

GENERAL INFORMATION

REGISTRATION

All participants are requested to register. Registration takes place at the Congress Centre Registration Desk, in "Breza" Hotel.

IDENTIFICATION CARDS

All registered participants receive Identification Cards (IC) upon registration. Your IC is the document to enter the Congress and any of the working rooms. We kindly ask you to wear your IC visibly during all events.

LANGUAGE

The official languages of the Congress are Serbian or English. Simultaneous translation will not be provided.

INSTRUCTIONS TO AUTHORS - SLIDE CENTRE

Scientific Presentations will be given on Personal Computer: Power Point – 2007, 2010. Alternatively, the overhead projector could be requested. Please ask for help at the Control Room in Breza Hotels not less than two hours before your presentation (or the day before, if your presentation is scheduled in the morning).

CONGRESS ASSISTANTS

There is a Congress Assistant assigned to each working room to help Chairpersons and speakers to use presentation tools.

SOCIAL EVENTS

The organizers are pleased to inform that the following Social Events are planned:

Reception at the Mayor of Vrnjačka Banja: 18:30, Tuesday, June 4, 2013

CONGRESS BANQUET: Hotel "Breza" restaurant, 20:15, Thursday June 6, 2013

EXCURSION: Wednesday, June 5, 2013:

14:45h Departure in front of the building of the Hotel "Breza"

15:30h - 17:30h Ljubostinja (sightseeing, orthodox religious center, vine cellar)

<http://en.wikipedia.org/wiki/Ljubostinja>
